GEC JOURNAL OF SCIENCE & TECHNOLOGY

INDEX TO VOLUME 46, 1980

THE GENERAL ELECTRIC COMPANY LIMITED

INDEX

VOLUME 46, 1980

Inclusive page numbers for the year's issues are:

No. 1	1 to 48
No. 2	49 to 96
No. 3	97 to 148

PAGE

A

Aircraft—A helmet-mounted sight system for fighter....33
Application—Microelectronics and its....111
Applications of power semiconductors....73
Asymmetrical thyristor—Design and performance of a medium-power....67
Avionic applications—High-resolution LED displays for....91

C

CAD techniques applied to diesel engine design: extension of the RK range....3
Coal-burning on turbo-machinery for future large-scale power generation—Impact of....25
Control of lifts—A microprocessor network for use in....11
Convertor systems for JET—High-power d.c....139

D

Design and performance of a medium-power asymmetrical thyristor....67
Diesel engine design—CAD techniques applied to: extension of the RK range 3
Diesel engines—Predicting the temperature of pistons of some highly rated medium-speed....61
Digital telephone—The....19
Dynamic positioning systems for ships: operational experience....39

F

Flywheel generators for the JET experiment....128
Fusion experiment—The JET project: a controlled thermonuclear....121

G

Gears—A wider scope for nitrided....99
GEC publications—In other....148
Generators for the JET experiment—Flywheel....128

PAGE

H

Helmet-mounted sight system for fighter aircraft—A....33
High-power d.c. convertor systems for JET....139
High-resolution LED displays for avionic applications....91

I

Impact of coal-burning on turbo-machinery for future large-scale power generation....25
In other GEC publications....148

J

JET experiment—Flywheel generators for the....128
JET—High-power d.c. convertor systems for....139
JET project—The: a controlled thermonuclear fusion experiment....121

L

LED displays for avionic applications—High-resolution....91
Lifts—A microprocessor network for use in control of....11

M

Machinery characteristics—Optical measurement of....83
Microelectronics and its application....111
Microprocessor network for use in control of lifts—A....11

N

Nitrided gears—A wider scope for....99

O

Operational experience—Dynamic positioning systems for ships....39
Optical-fibre systems for telecommunications....51
Optical measurement of machinery characteristics....83

PAGE

P

Performance of a medium-power asymmetrical thyristor—Design and 67
Positioning systems for ships—Dynamic: operational experience 39
Power generation—Impact of coal burning on turbo-machinery for future large-scale 25
Power semiconductors—Applications of.....73
Predicting the temperature of pistons of some highly-rated medium-speed diesel engines.....61

R

RK range—CAD techniques applied to diesel engine design: extension of the.....3

S

Semiconductors—Applications of power.....73
Ships—Dynamic positioning systems for: operational experience 39
Sight system for fighter aircraft—A helmet-mounted 33

PAGE

Synopses.....2, 50, 98
Systems for telecommunications—Optical-fibre 51
'System X' unveiled at Telecom '79 32

T

Technical literature 96
Telecom '79—'System X' unveiled at 32
Telecommunications—Optical-fibre systems for 51
Telephone—The digital 19
Temperature of pistons of some highly-rated medium-speed diesel engines—Predicting the 61
Thermonuclear fusion experiment—The JET project: a controlled 121
Thyristor—Design and performance of a medium-power asymmetrical 67
Turbo-machinery for future large-scale power generation—Impact of coal-burning on.....25

W

Wider scope for nitrided gears—A 99
